

Stormdrain Operation and Maintenance  
City of West Hollywood  
FY 2007-2008

A map of all catch basins, broken down by priority A, B and C was submitted with FY 2005-2006 annual report.

Catch Basin Cleaning Schedule

For this reporting cycle, catch basins were cleaned under a contract with Los Angeles County Department of Public Works. The cleaning was done for all catch basins (A, B and C) in compliance with the LACDPW's schedule for Wet Season (3 cleanings) and Dry Season (1 cleaning). This comes to a total of 4 cleanings for all Priority A, B and C basins. Dates for this cleaning are on file with LACDPW's Construction Division. Approximate dates are November, January and March for Wet Season and September for Dry Season cleanings.

Total Waste Collected from Clean-outs

Accurate information is not available. Since the City participates in the LACDPW's regional contract for catch basin cleaning, it is impossible to get data regarding the waste collected from catch basins in West Hollywood. The County only has total tonnage information for the entire project. Simply taking a fraction of that total tonnage would not be accurate, since the quantity cleaned from each basin is different. Also, the City of West Hollywood has debris excluders on many catch basins which significantly reduce the amount of debris requiring cleaning.
